

# Environmental & Energy Policy Statement

Issued:  
March 2026

Version Number: 2

## 1. Introduction

- 1.1. Global Switch is a leading owner, operator and developer of large scale, carrier and cloud neutral, multi-customer, data centre facilities in Europe and Asia-Pacific. Global Switch's core offering is technical space with resilient 24x7x365 power and cooling, security, and infrastructure and environmental monitoring for its customers to house their computer servers, network equipment, and other IT infrastructure.
- 1.2. Global Switch is committed to maintaining its market leading position in Europe and Asia-Pacific and to growing its business as markets develop in a responsible way.
- 1.3. At Global Switch, environmental management means delivering a best-in-class product and service to our customers while preventing or minimising our negative and realising our positive environmental impacts.
- 1.4. Global Switch is committed to the protection of the environment, including prevention of pollution, sustainable resource use, climate change mitigation and adaptation, and the protection of biodiversity and ecosystems relevant to our activities.
- 1.5. Global Switch is committed to continually improving environmental performance and energy performance through the implementation and continual improvement of our Environmental and Energy Management Systems.

## 2. Objectives

- 2.1. The purpose of this policy statement is to confirm our commitment to meeting the environmental standards expected by our stakeholders in the delivery of our services.
- 2.2. This policy provides the framework for establishing and reviewing environmental and energy objectives and targets across the organisation.

In doing so Global Switch strives to:

- a) Provide and maintain ISO 14001 and ISO 50001 certified Environmental and Energy Management Systems across all Global Switch data centres, ensuring they are effectively implemented, maintained and continually improved, and conform to all applicable environmental, energy, legal, regulatory and statutory requirements and other relevant compliance obligations.
- b) Ensure this policy and supporting objectives are understood by all Global Switch staff, suppliers, and contractors and to provide relevant skills, induction and environmental and energy awareness training as required.
- c) Ensure responsibilities are clearly defined and established with clear communication to all staff and contractors.

- d) Minimise risk through championing ‘best practice’ by creating a continuous improvement environment to ensure that knowledge, skills and experience are optimised.
- e) Review and assess our business with a view to identifying opportunities that will enable us to improve our methods, operations and procedures to ensure they are aligned to our stakeholders’ needs and for safeguarding our natural environment.
- f) Actively engage with our stakeholders through regular dialogue and collaboration to ensure their needs and expectations are understood, addressed, and where possible exceeded.
- g) Global Switch commits to publishing transparent, comprehensive annual updates on our environmental and energy performance to demonstrate accountability to our stakeholders via our Environmental, Social and Governance (ESG) Report.

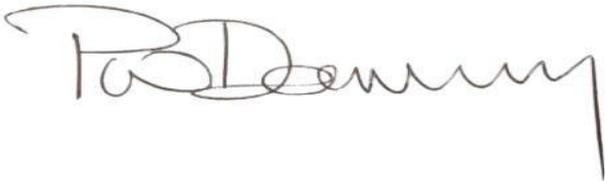

We aim for:

- achieving our Science Based Targets for emissions reduction
  - 100% renewable electricity procurement
  - energy efficiency (Power Utilisation Efficiency – PUE)
  - water efficiency (Water Utilisation Efficiency – WUE)
  - reduction of potable water consumption and conservation of freshwater quality
  - sustainable design and build of data centres in line with global green building standards,
  - refrigerant gases with low GWP
  - waste minimisation and circular economy
  - pollution prevention and control including the protection of biodiversity
- h) Global Switch is committed to improving energy performance, including energy efficiency, energy use and energy consumption across our operations.
  - i) We will support the procurement of energy-efficient products and services and support design activities that consider and improve energy performance across the lifecycle of our data centres, infrastructure and operations.
  - j) Provide the necessary resources to support this policy and achieve the objectives.
  - k) Global Switch will ensure the availability of information and resources necessary to achieve

environmental and energy objectives and targets.

### 3. Responsibilities

- 3.1. All Global Switch staff, suppliers and contractors are required to understand and comply with this policy and to actively contribute to the continual improvement of environmental and energy performance and the effectiveness of the Environmental and Energy Management Systems.
- 3.2. Managing Directors are accountable for implementing this policy at their respective sites ensuring the Environmental and Energy Management Systems are effectively maintained, that Global Switch continues to provide a resilient, environmentally responsible, safe and secure environment, and that this policy is documented, communicated within Global Switch and made available to relevant interested parties and the public.

**Peter Domoney**

Chief Operating Officer, Global Switch
